### **3. Relief Camp Khairpur city.**

This camp is organized for collecting donation from the people. GSF is playing the main role and other civil society organizations are working under the umbrella of GSF for collecting donation to give relief at the needy place. From here we are collecting donations, gathering volunteers, medicines and other related stuff. GSF is in contact with the EDO (CDD) and in the end of the day a meeting held where need assessment is considered and then decisions made that where this donation could be best utilize. We had installed 2 hand pumps at Girls High School, Baberlo; where about 2500 people are getting relief and shelter. There was a need of water and having many people in the school it was difficult to render safe drinking water on large scale. Therefore, to fulfill the need of water hand pumps were installed to meet the need. Crockery is also providing at the relief camps by GSF and other Civil Society Organization from the collected donation and food is providing by the government in the camps.
